

Microcare Data Acquisition Application

The Microcare data Acquisition Application allows users to easily monitor real-time information of their Microcare LCD MPPT's from their PC's.

- Monitoring of Microcare equipment
- Changing setting on the Microcare MPPT
- Graphing of connected device parameters like battery voltage, PV voltage & load power
- Can be used to identify possible shading on PV
- Used as a tool to analyze the solar system

This application is freely available for download on the Microcare website www.microcare.co.za and requires a Microcare Data Acquisition Cable

The following downloads are available at www.microcare.co.za/data-acquisition-application

Installing USB – RS232 Driver	MPPT Data Acquisition Application	MPPT Data Acquisition Documentation	Protocol explanation
