

# 1.5kW 380V Solar VSD Pump Controller

All Microcare products are designed and developed locally with extensive field testing before proceeding with the manufacturing process. Ideal for South African conditions the Microcare Three Phase Solar VSD Pump Controller is designed to provide power to remote applications of motors and pumps. Driven by local innovation the unit is a Maximum Power Point Tracker (MPPT) facilitating a maximum power generation for efficient usage. With its variable speed selectable control and flow switch input the unit is able to offer a true Solar Pump Controller capable of producing high efficiency and maximum power output. The unique built in overdrive feature allows for a lower PV voltage operation.

- Surge Protection
- PV Panel Input Voltage of 450-1000 VDC
- Compatible with three-phase 220V & 380V motors that are VSD approved
- LED status feedback
- High - Low water input connectors
- Float switch input
- Trip and restart controls
- Built in Variable Speed Drive (VSD)
- Unique overdrive feature allows lower PV Voltage operation than is currently available on the market
- IP44 rated
- No external enclosure box required
- Cost effective installation
- Available with comms port for Wi-Fi connection
